high-grade materials and a solid construction
- ▶ **user-friendly and low-maintenance**
simple and safe handling due to the well-thought-out design
- ▶ **service-orientated and guaranteed**
as manufacturer we offer spare parts-guarantee and service

The clean and wet cutlery is given directly into the cutlery polishing machine TD 2000.

The cutlery is spirally transported upwards through a high-grade sterile granulate and is dried and polished. The installed ventilator prevents that granulate comes out of the machine.

The regular use of the cutlery polishing machine TD 2000 keeps your cutlery shining.

The simple operation of the cutlery polishing machine TD 2000

Whether chromium, stainless steel or even high-grade silver – the clean and wet cutlery is given directly from the dishwasher into the cutlery polishing machine TD 2000.

Via the internal vibrating conveyor it is spirally transported upwards through a high-grade granular substance. This purely natural product dries and polishes your cutlery and keeps it shining – with just a single run. The granulate has to be exchanged every 4 – 8 weeks depending on the frequency the machine is used. The machine operates very quietly due to a special coating.

Your cutlery will not only pass the inspection by your guests, it even meets the strict EU-Hygienic Guidelines: a special UVC-lamp sterilizes both, the cutlery and the granulate.

The constant use of the cutlery polishing machine TD 2000 reduces the oxidation of cutlery in a remarkable way and makes it look noticeably better.

Option: mobile underframe TD 2000
43 x 53 x 31 cm (l x w x h)

Special technical features

- ▶ low priced model for first-time users
- ▶ space saving
- ▶ ventilator for perfect shine
